News headlines about vitamin D are appearing everywhere. For years, most of us wrongly assumed we'd be fine if we drank a little milk and took a multivitamin pill. Now, studies are reporting most of us are vitamin D deficient and those deficiencies may well be causing numerous illnesses, especially cancer.

*John J. Cannell, MD,
Vitamin D Council.*

A recent study, Vitamin D and Breast Cancer, noted that ecologic studies have shown an inverse correlation between breast cancer mortality and sun exposure and dietary vitamin D intake. PMID: 17437690 [PubMed]
