

# Arkansas Chiropractic Society Presents:

## Clinical Evaluation and Protocols for Identifying Stroke Risk

&

### Get Back in the Game/

### Simple and Quick Techniques to Get Weekend Warriors, Youth and Elite Athletes Back From Injuries

Dr. Kirk Gair

Dr. Steven Bennett

## About The Instructors and Courses

## Seminar Details

**INSTRUCTOR: Dr. Steven Bennett** graduated from Palmer College of Chiropractic and has been practicing in Little Rock since 1982. He is a specialist in chiropractic orthopedics and is one of only seven in this state. He is active in maintaining and advocating high standards of practice for chiropractic in this state. Dr. Bennett is the current President of the Arkansas Chiropractic Society.

**This Course:** will cover stroke anatomy and physiology, brain vascular anatomy and how blood perfusion affects brain function and a detailed analysis of the blood supply to the brain and the physiology of ischemia. We will also discuss the various types of stroke identifying ischemia, hypoperfusion, infarct and penumbra zones and emboli. We will cover the clinical evaluation and protocols for identifying stroke risk. We will detail the complications of stroke and future care in the chiropractic clinical setting.

**INSTRUCTOR: Dr Kirk Gair** has been in private practice since 1999 and began using Erchonia cold lasers in 2004. During that time, he has worked with athletes of all levels, including Super Bowl Champions, MLB champions, High School wrestling National and State champions, college and high school football, baseball, and track champions and record holders, and with the Dodgers/Angles Fantasy Camp. Due to the results he gets with his laser protocols, he has a wait list, 100% referral practice. In addition to treating top level athletes, he has also completed additional training in functional medicine and functional neurology under the guidance of internationally acclaimed Dr. Datis Kharrazian, and has patients come from all over the US for help.

**THIS COURSE:** Most doctors do not fully understand what their lasers do, are unaware of the immense volume of research that supports their uses, and they lack confidence in talking to patients about how lasers can help them get to their health goals faster than other modalities.

Even worse, they struggle to explain how their lasers can help their patient's condition, have no idea what to charge, and usually give the service away. This seminar will not only teach the doctors the incredible volume of research behind their lasers that supports many uses in practice that will set them apart from their competition, it will also give them the tools to help insulate them from the threats of diminished insurance reimbursements, delayed personal injury payouts, and competition from low cost marketing groups and membership franchises.

- **DATE:** April 18 & 19, 2020
- **Starts:** 8 a.m. both days
- **ASBCE Approval: #AR 7784.** Should you need approval for another state please call the ACS office.
