

Documentation can be the most frustrating part of your practice. At Document Plus© we believe that we can free up hours of paperwork every single day. Document Plus© uses a unique combination of scannable forms, a scanner and software to quickly and efficiently create documentation using Microsoft Word®.

*Within seconds... the completed forms can be scanned into the system. Just as quickly, the system integrates, reviews for input procedures, stores for future use, and exports the information to practice management software. When needed, the system can generate letters and narratives in layman's terms for the patient, in legal terms for attorneys, or in a format to send to referring physicians and insurance companies. The healthcare provider's valuable time that was previously spent on doing paperwork is essentially freed-up to deal with what is most important...
-treating the patient.*

"The Document Plus EMR system made it easier when 50 new patients were referred to my office from a pain clinic in a single day. Thanks to your system and the quality of reports we send out, patients, attorneys, and medical doctors all refer."

-Dr. Royce Jones
Gadsden, AL
