

Improve patients Posture With the Posture Medic™

Stretch-Strengthen-Stabilize

The Posture Medic™ is specifically designed to help you overcome your poor posture habits and retrain your body to stand up straight with our easy Stretch – Strengthen – Stabilize program. Using the Posture Medic for our short and simple 15 minute (1 modality) stretch and strengthen program improves your patients range of motion and upper body strength. This lets them straighten up and stand tall naturally. Then, by wearing the Posture Medic as a dynamic brace, your patients retrain their body to maintain the ideal position; head up, straighter neck & back, an open chest, and shoulders back & down. They'll feel the difference in just one use.

Immediate Results - Doctor Recommended - Every Body Needs One
