

Standard Process, Inc. Celebrates 80th Year!

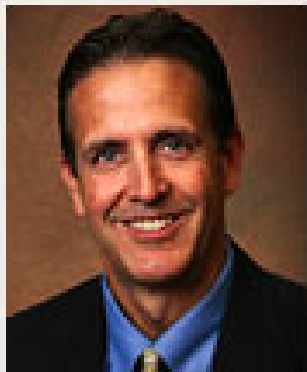

What we have learned in 80 years:

When Dr. Royal Lee, founder of Standard Process, was asked about "vitamins", synthetic, isolated or factory made (phytochemicals, nutraceuticals, antioxidants . . .) he stated in 1938:

"Do not be fooled. These . . . are not idle arguments, but are basic laws of nutrition. You can ignore them only at your own risk, for it will be yourself and those who depend upon your opinions who will suffer from the consequences of ignorance."

Do not let your patients buy vitamins from a store, internet or mail-order, and don't trust your business and reputation to non-whole food vitamins from less experienced companies!!

**Build on our Foundation of Success:
Our reputation is your reputation.**
